DETAILED ACTION

In view of the Petition to Vacate Restriction Requirement and Subsequent Office Action filed 26 April 2004, the restriction requirement (02 October 2003) and Non-Final Office Action (25 February 2004) are vacated, thereby rendering Applicant's election filed 02 December 2003 moot. The amendment filed 02 December 2003 has been entered in full. Claims 3, 6-10 and 12 were cancelled.

Status of Application, Amendments and/or Claims

Applicant's election of Group III (claim 11, drawn to a pharmaceutical composition comprising a combination of alpha-MSH or and/or alpha-MSH equivalent and EPO and/or EPO equivalent together with a pharmaceutically acceptable carrier), in the reply filed on 07 October 2004 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1, 2, 4, 5, 13-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 07 October 2004. Claim 11 is under examination.

Information Disclosure Statement

The information disclosure statement filed 01 October 2001 was received and complies with the provisions of 37 CFR 551.97 and 1.98. It has been placed

in the application file and the information referred to therein has been considered as to the merits.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shohaib *et al.*, (Nephron 1999:81:81-83) in view of Kwon *et al.*, (American Journal of Physiology 1999 Sept 277, 3 Pt 2, F413-27). The instant claims are drawn to a pharmaceutical composition comprising a combination of alpha-MSH or and/or alpha-MSH equivalent and EPO and/or and EPO equivalent together with a pharmaceutically acceptable carrier. Shohaib *et al.* teach the use of a pharmaceutical composition comprising EPO in post-renal transplant patients. Shohaib *et al.* do not teach the use of alpha-MSH pharmaceutical composition. Kwon *et al.* teach the use of a pharmaceutical composition comprising alpha-MSH to reduce renal functional defects.

It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art." In re Kerkhoven, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980) (citations

Art Unit: 1647

omitted) (Claims to a process of preparing a spray-dried detergent by mixing together two conventional spray-dried detergents were held to be prima facie obvious.). See also *In re Crockett*, 279 F.2d 274, 126 USPQ 186 (CCPA 1960) (Claims directed to a method and material for treating cast iron using a mixture comprising calcium carbide and magnesium oxide were held unpatentable over prior art disclosures that the aforementioned components individually promote the formation of a nodular structure in cast iron.); and *Ex parte Quadranti*, 25 USPQ2d 1071 (Bd. Pat. App. & Inter. 1992) (mixture of two known herbicides held prima facie obvious).

In the instant case, the references demonstrate the use of a pharmaceutical composition for treatment in renal failure patients. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the EPO pharmaceutical composition of Shohaib by formulating it with the alpha-MSH pharmaceutical composition of Kwon *et al.* to make the instant pharmaceutical composition of EPO and alpha-MSH with a reasonable expectation of success. The motivation and expected success is provided by both Shohaid and Kwon, in that Shohaid demonstrates that EPO has been effective in treating anaemia due to renal failure and has been widely used in post-renal transplant patients and Kwon *et al.* teach that alpha-MSH treatment reduced renal functional defects.

Conclusion

No claim is allowed.
